EDUCATION

The University of Texas at Arlington

Arlington, TX

B.S in Software Engineering, Minor in Mathematics

August 2021 – May 2025

Relevant Coursework: Data Structures and Algorithms, Fundamentals of Probability, Linear Algebra, Object Oriented Software Engineering, Operating Systems, Assembly and Computer Architecture, Theoretical Computer Science, Databases

Leadership: ColorStack UTA (Founder & President), ACM UTA (Community Manager), SHPE UTA, Mobile Dev Club (Officer)
B.A in Music Performance, Trombone

August 2015 – May 2020

TECHNICAL SKILLS

Languages: Java, Python, Go, C++, C, C#, JavaScript, Typescript, HTML5, CSS, SQL

Technologies and Tools: AWS, Azure, Docker, Databricks, OAuth, MongoDB, PostMan, GIT, Kafka, Jira, Agile, Waterfall, Unix, Insomnia-REST, OpenCV, TensorFlow, Jenkins, Unity, Spark, Hadoop

Frameworks: Spring-Boot, ReactJS, NextJS, NodeJS, Angular, React Native, ElectronJS, Django, Flask

WORK EXPERIENCE

Amazon Web Services

Seattle, WA

Software Engineering Intern - Cloudfront Team

Est. September 2024

Adobe

Seattle, WA

Software Engineering Intern

May 2024 – August 2024

- Migrated the previous data silos and architected the new User data-lake solution on Databricks which enabled processing on over 1 Petabyte of data to ensure GDPR compliance and reduce manual efforts/intervention and costs by an estimated 66%.

Sensing, Analytics & Intelligence Lab, UT Arlington

Arlington, TX

Undergraduate Research Intern

December 2023 – April 2024

- Developed and deployed FireWatch Cart, which is a portable monitoring system designed for early detection of hazards in critical locations across multiple nuclear power plants and creates a central location to save past data.
- Leveraged AWS GreenGrass MQTT, and IOT technologies to establish communication channels between various edge devices, sensors, and the cloud to create a real time monitoring approach to reduce manual effort.

JP Morgan Chase & Co.

Plano, TX

Software Engineering Intern

June 2023 – August 2023

- Built a self healing module that reduced application service outages across the firm with a 90% success rate on covered errors. Built to be highly configurable by allowing the addition of more errors and changing the restart time.
- Connected to different connectors to handle errors and kept a reference datalog of methods used to resolve said errors and interacted with Jira API to update tickets with actions taken or link solution documentation.

Android Industries

Arlington, TX

IT Technical Intern

August 2022 – May 2023

- Assisted in the monitoring and resolving of technical support requests for over 1000 users at a General Motors support plant.
- Helped with projects in the plant including the cataloging and setting up of 300+ computers on the company network.

PROJECTS

ChessQuest (AR/VR Chess)

C#, .NET, Unity, ARKit, LichessAPI

- Developed an immersive AR/VR chess game utilizing the Stockfish Engine and LichessAPI for enhanced gameplay while putting focus on generating students interest in Chess and technology by adding a fun and friendly UI/UX.

NestPass (Password Manager for Developers)

Go, ElectronJS, gRPC, Kafka

- Developed a cross-platform password manager that organizes passwords in a tree-based hierarchy for easy retrieval while featuring a custom CLI for developers to inject environment variables securely.
- Used a trie data structure and cached frequently used nodes with Redis to reduce password retrieval time by 34 ms.

fam.ily (Family Focused Social Media Website)

MongoDB, Next.js, Express, React, Vercel, Agile

- Implemented design and UI using React.js to create an application dedicated to family history, moments, pictures and privacy. Used Next.js to optimize server side rendering and integrated real time communication features.
- Integrated authentication and authorization features to ensure the privacy and security of family members' data.
